180° OPENING LOUVRE ROOF SYSTEM

kudos opening roof can be built in a free-standing frame, off of your current building or into any suitable existing structure. The blades rotate through 180° allowing total sun management under the roof. A louvre roofing system is suitable for your pergola, verandah, patio or any new or existing structure outside your home. Imagine sitting outside having a BBQ in the middle of summer with your guests without having to worry about being burnt to a crisp.

Louvre Roofing provides protection from harmful summer sun, maximises winter sun. Creates shade when you need it most, eliminates glare when you want it least.

Durable powder coated Louvre Roofing systems are available in colours to suit your choice of customisation and withstand the harsh conditions of Western Australia. Every kudos opening roof is waterproof & features its own in-built guttering system and is available as both hand operable & motorised. Both options benefit from the unique kudos "iDrive innovation" opening system.
